DETAILED ACTION

1. Claims 3, 4, 6, and 7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Stouffer (U. S. Patent No. 4,508,267).

Stouffer discloses a full coverage area spray nozzle comprising an oscillating chamber MOC, a dome shaped downstream end plate with an outlet d2, an upstream end plate with an inlet d1, end plates with D diameter, an L distance between the inlet and the outlet, a basic toroid flow pattern 32/32 (see figure 2), the toroid spinning about its cross sectional axis and having diametrically opposed cross-sections which alternate in size to cause the jet to move (see figure 2). Both the inlet and the outlet apertures have sharp edges.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to a

full coverage spray nozzle: Stouffer (U. S. Patent No. 4,151,955), Kondo et al., Srinath et al., and Stouffer (U. S. Patent No. 5,213,270).
